

EAE 127 Applied Aircraft Aerodynamics

Report Format

Title

Begin each report with the project title and your name for identification

For each problem, include the following sections:

Approach

Describe the problem and the methods used to solve it

Equations

Include relevant equations and descriptions of each equation

Code and Results

Present codes, results, and discussion in-line. After each figure or table, include discussion pertaining to that result. (For Project 1 only, code may be instead included as an appendix to the report).

Conclusion

Summarized the main conclusion that can be drawn from the analyses in the project.
